Descrizione

Now in its seventh edition, the manual includes more than one hundred questions, most in multiple parts and drawn from several years of exams at Bocconi University, on the models (IS-LM, IS-LM-PC etc.) and topics (the macroeconomic equilibrium of a closed economy, the labor market and unemployment, inflation, the open economy, government debt, economic growth) covered by most introductory courses on Macroeconomics. The main objective of the problems is to help readers grasp the economic reasoning and intuition underlying the main conclusions of the discipline – the aspect of Macroeconomics, and more in general of Economics, that students find the most difficult to master, but that will turn out to be the most useful in their future.
